After this case was closed 5 years later things surrounding this case seemed weird for Pip. Pip decided to solve this case as her final. With the help of Sal's brother and Andie's friends, she works to solve this case while putting her life in danger. Pip constantly gets threats from an unknown person in town as she finds out more about Andie's life, but despite this, she keeps going to find the true murderer of Andie Bell.

I love everything about this book. There were so many plot twists that made the book way better. The plot of the book kept you hooked which made me finish the book in one sitting. Reading it was a full roller coaster of emotions. This was one of my favorite reads this summer. The person behind the murder was the most shocking to me which left me with my mouth wide open. Not only that, but everything was nail-biting to find out. Once you began reading the book you had to finish it to find out the truth. I have never read a thriller book before, but this was such a great read.

I recommend this book to anyone who loves plot twists and thriller books. I would recommend this book more to high school students just because the book characters are high school students as well. Regardless, those who enjoy murder mystery books would definitely love this one too!
